### A RANGE OF STYLISH AND DURABLE OPTIONS

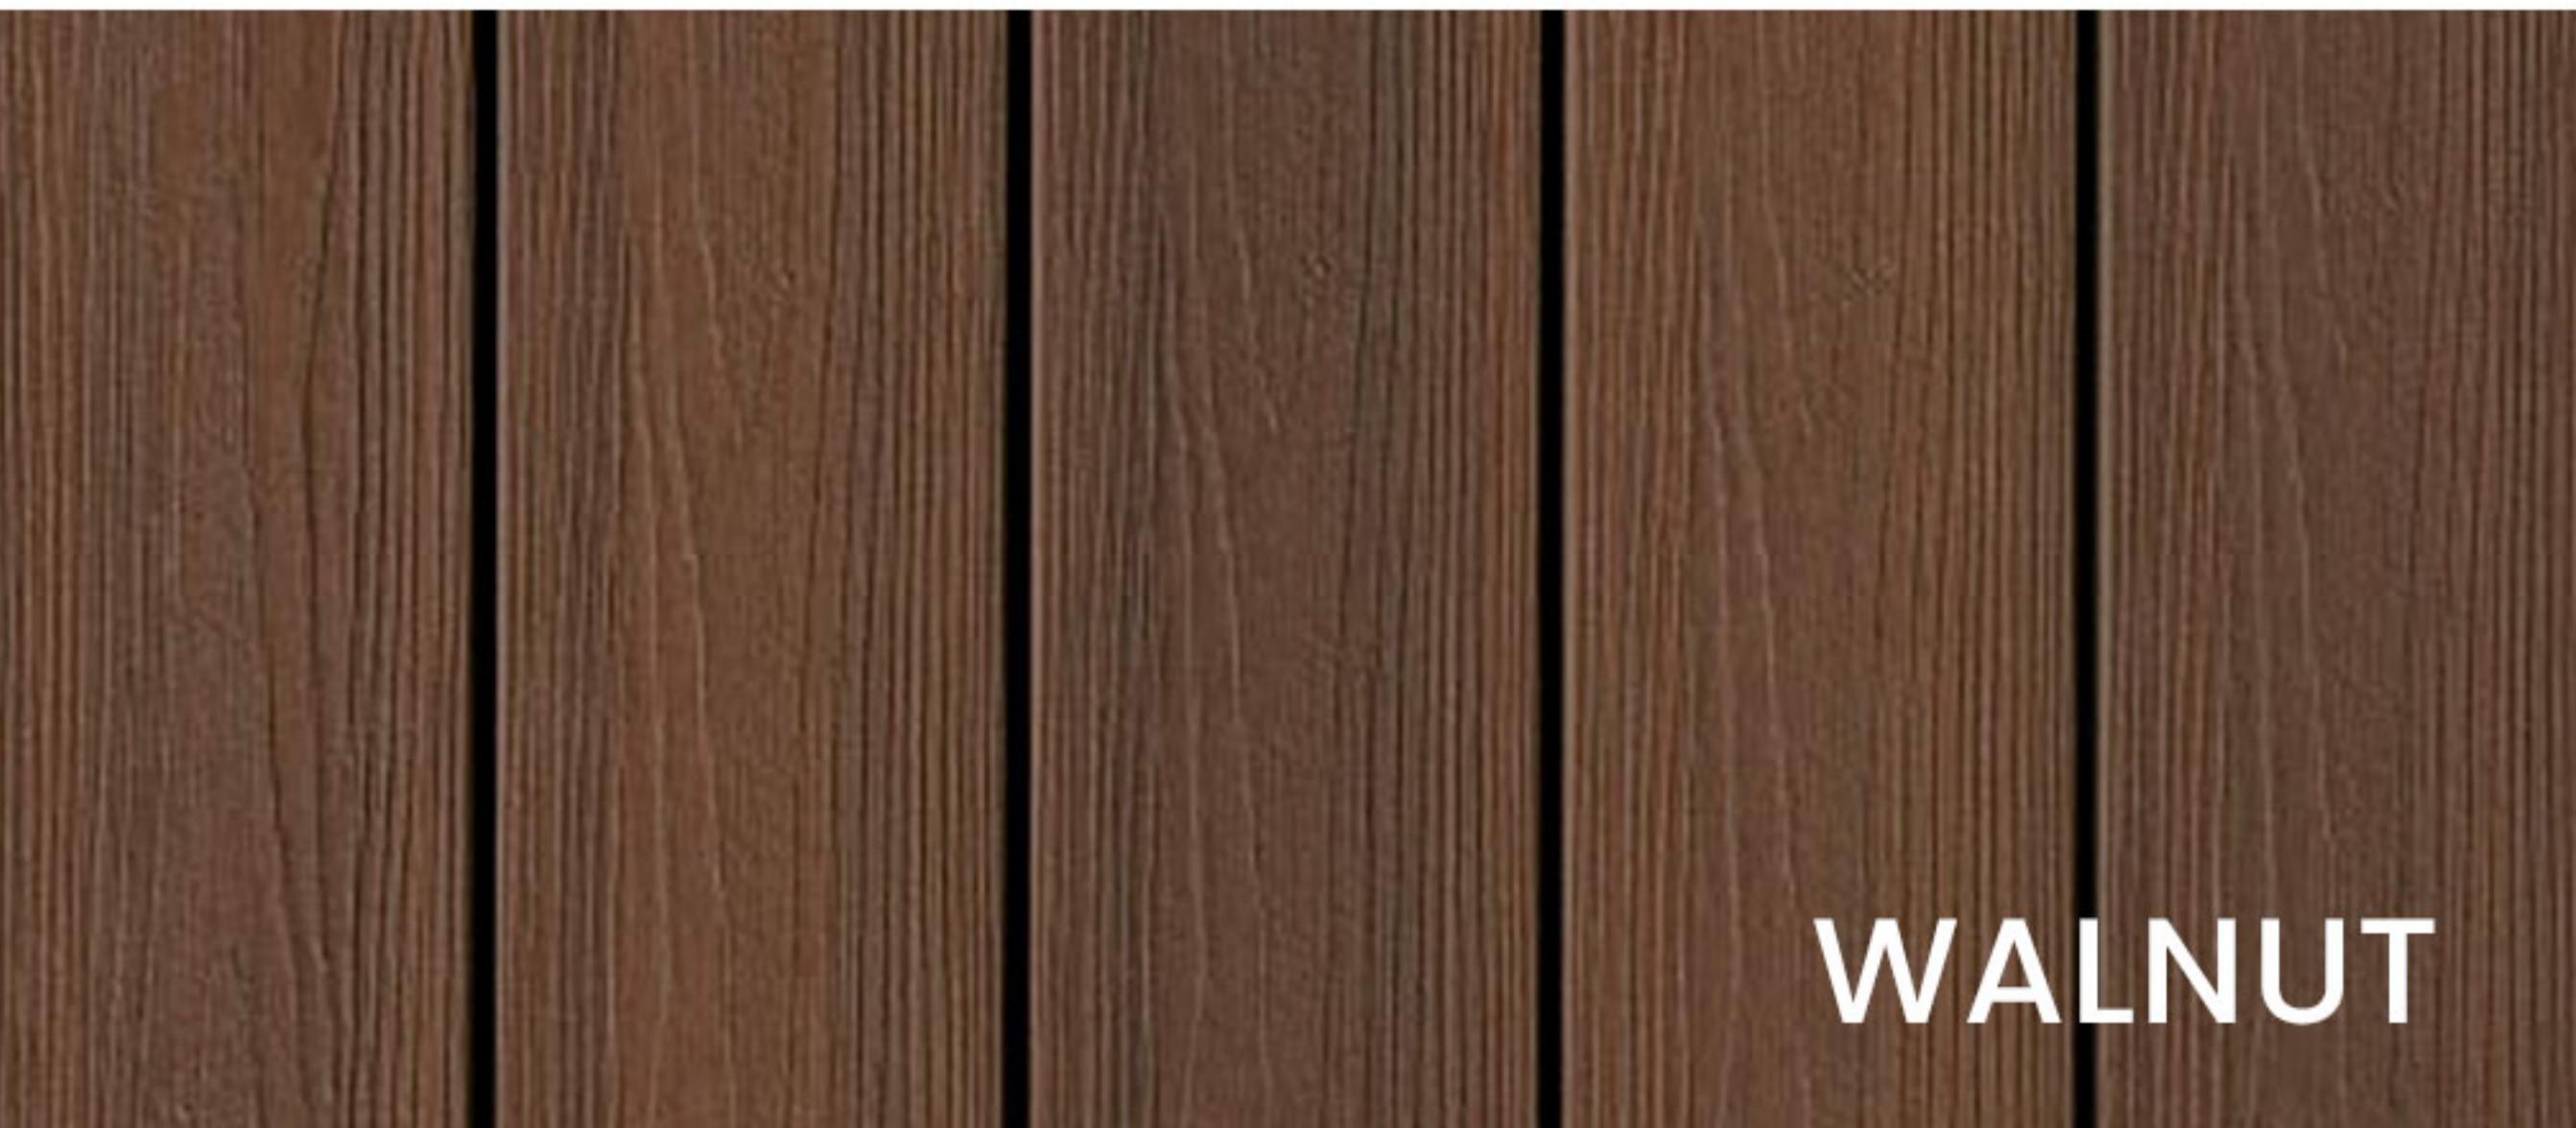

Co-extrusion WPC (Wood Plastic Composite) decking typically involves a process where a protective layer of polymer is co-extruded (or added) over the core of wood and plastic materials. This technique enhances the durability, appearance, and overall performance of the decking. The colors for co-extrusion WPC decking often comes in a range of natural wood tones as well as more modern, stylish options.

BLACK

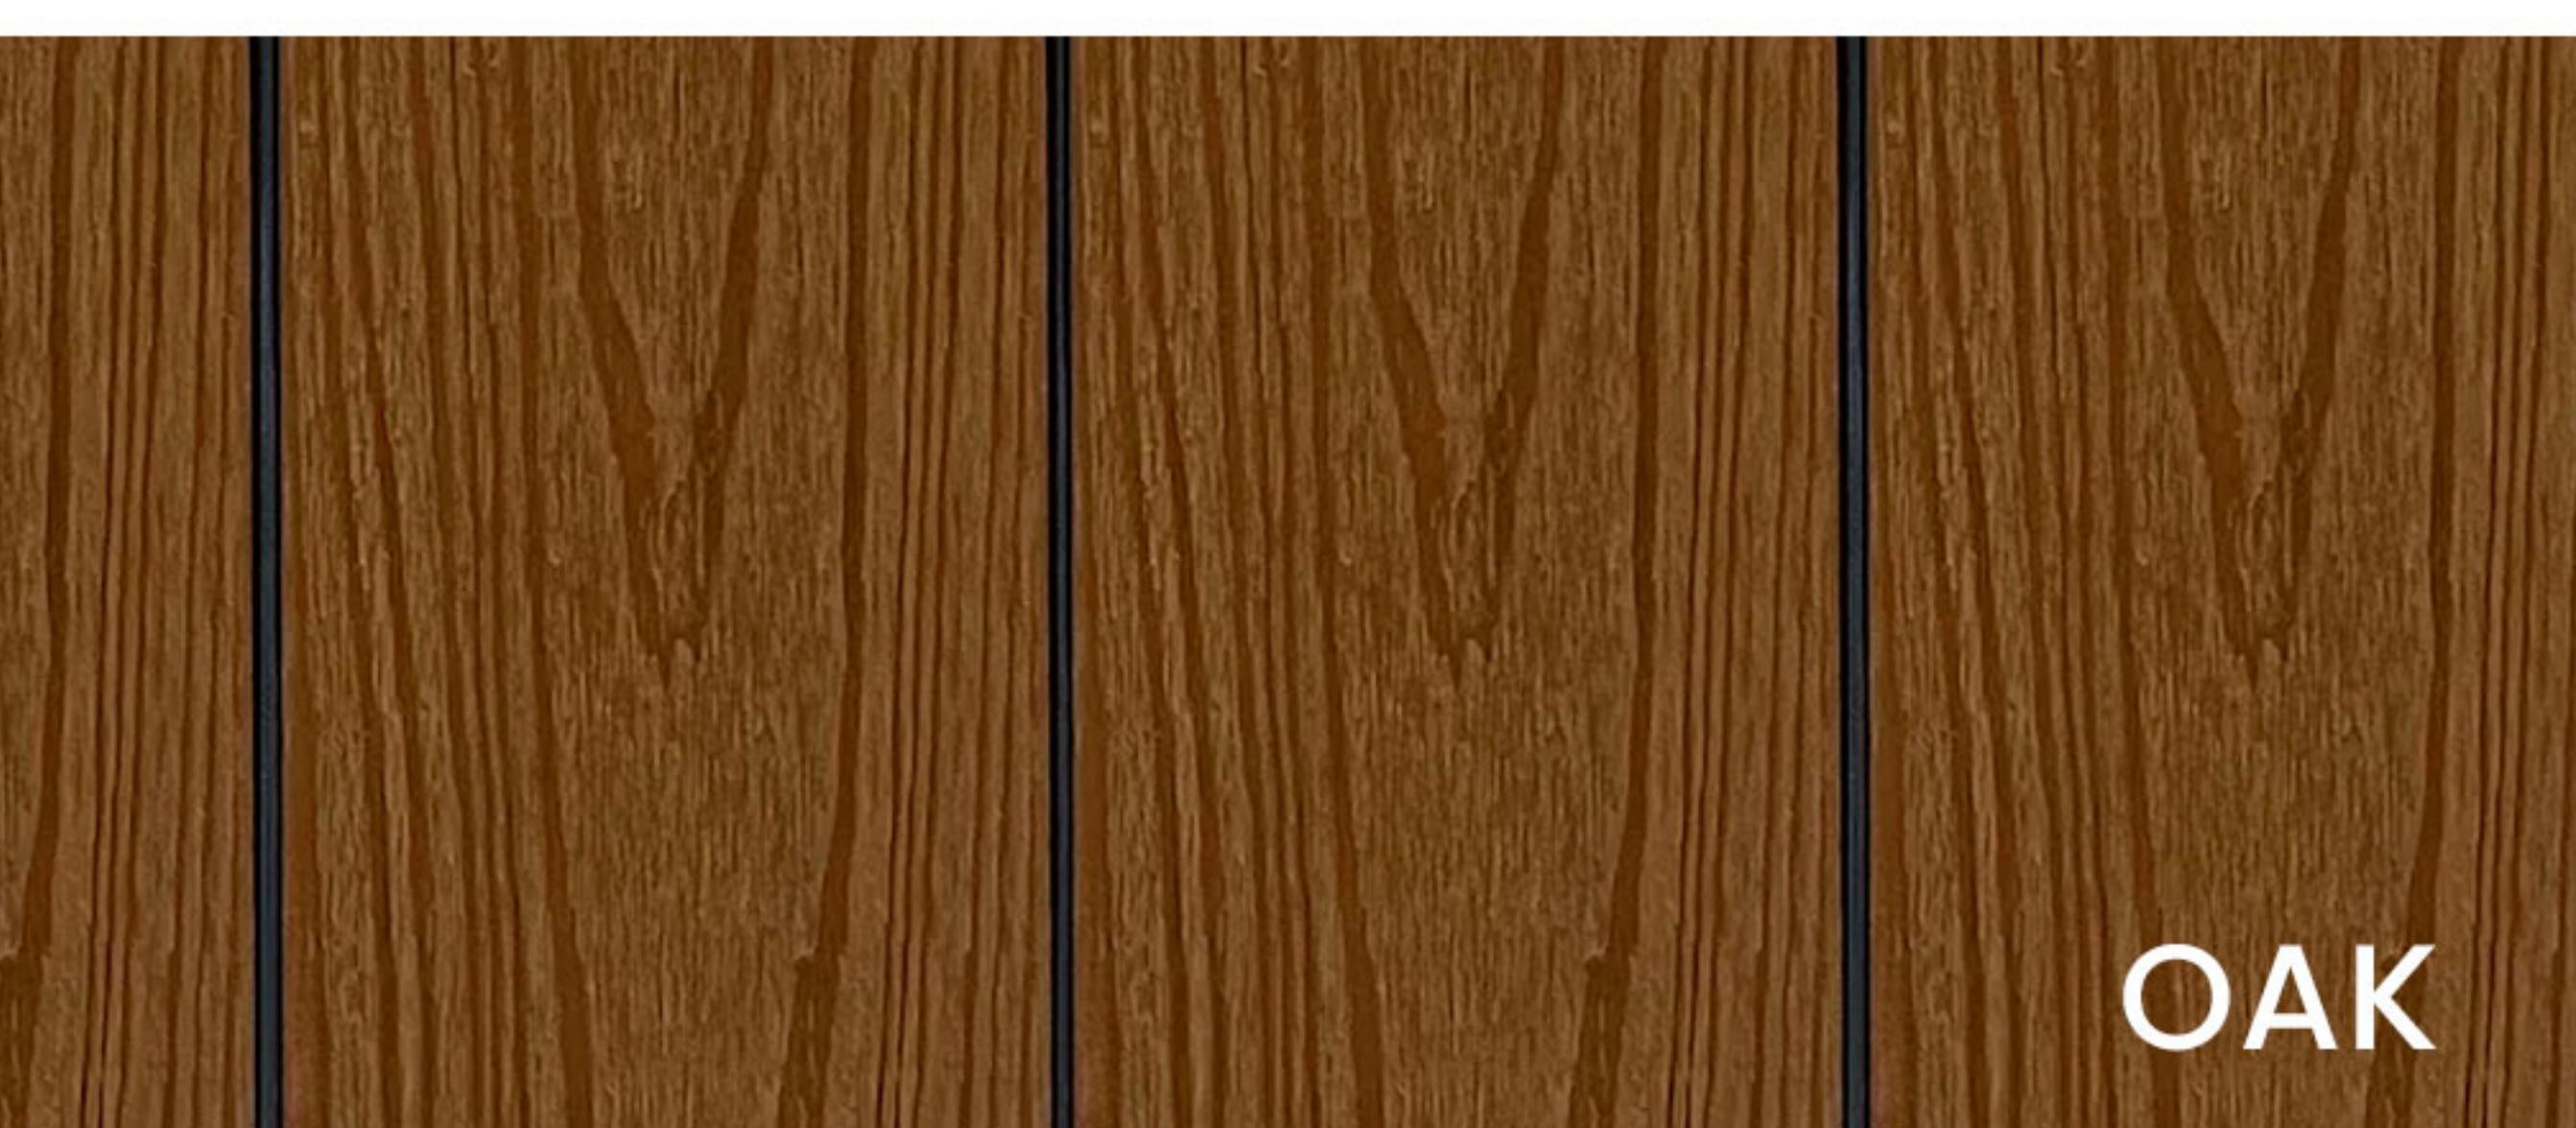

STONE GREY

WALNUT

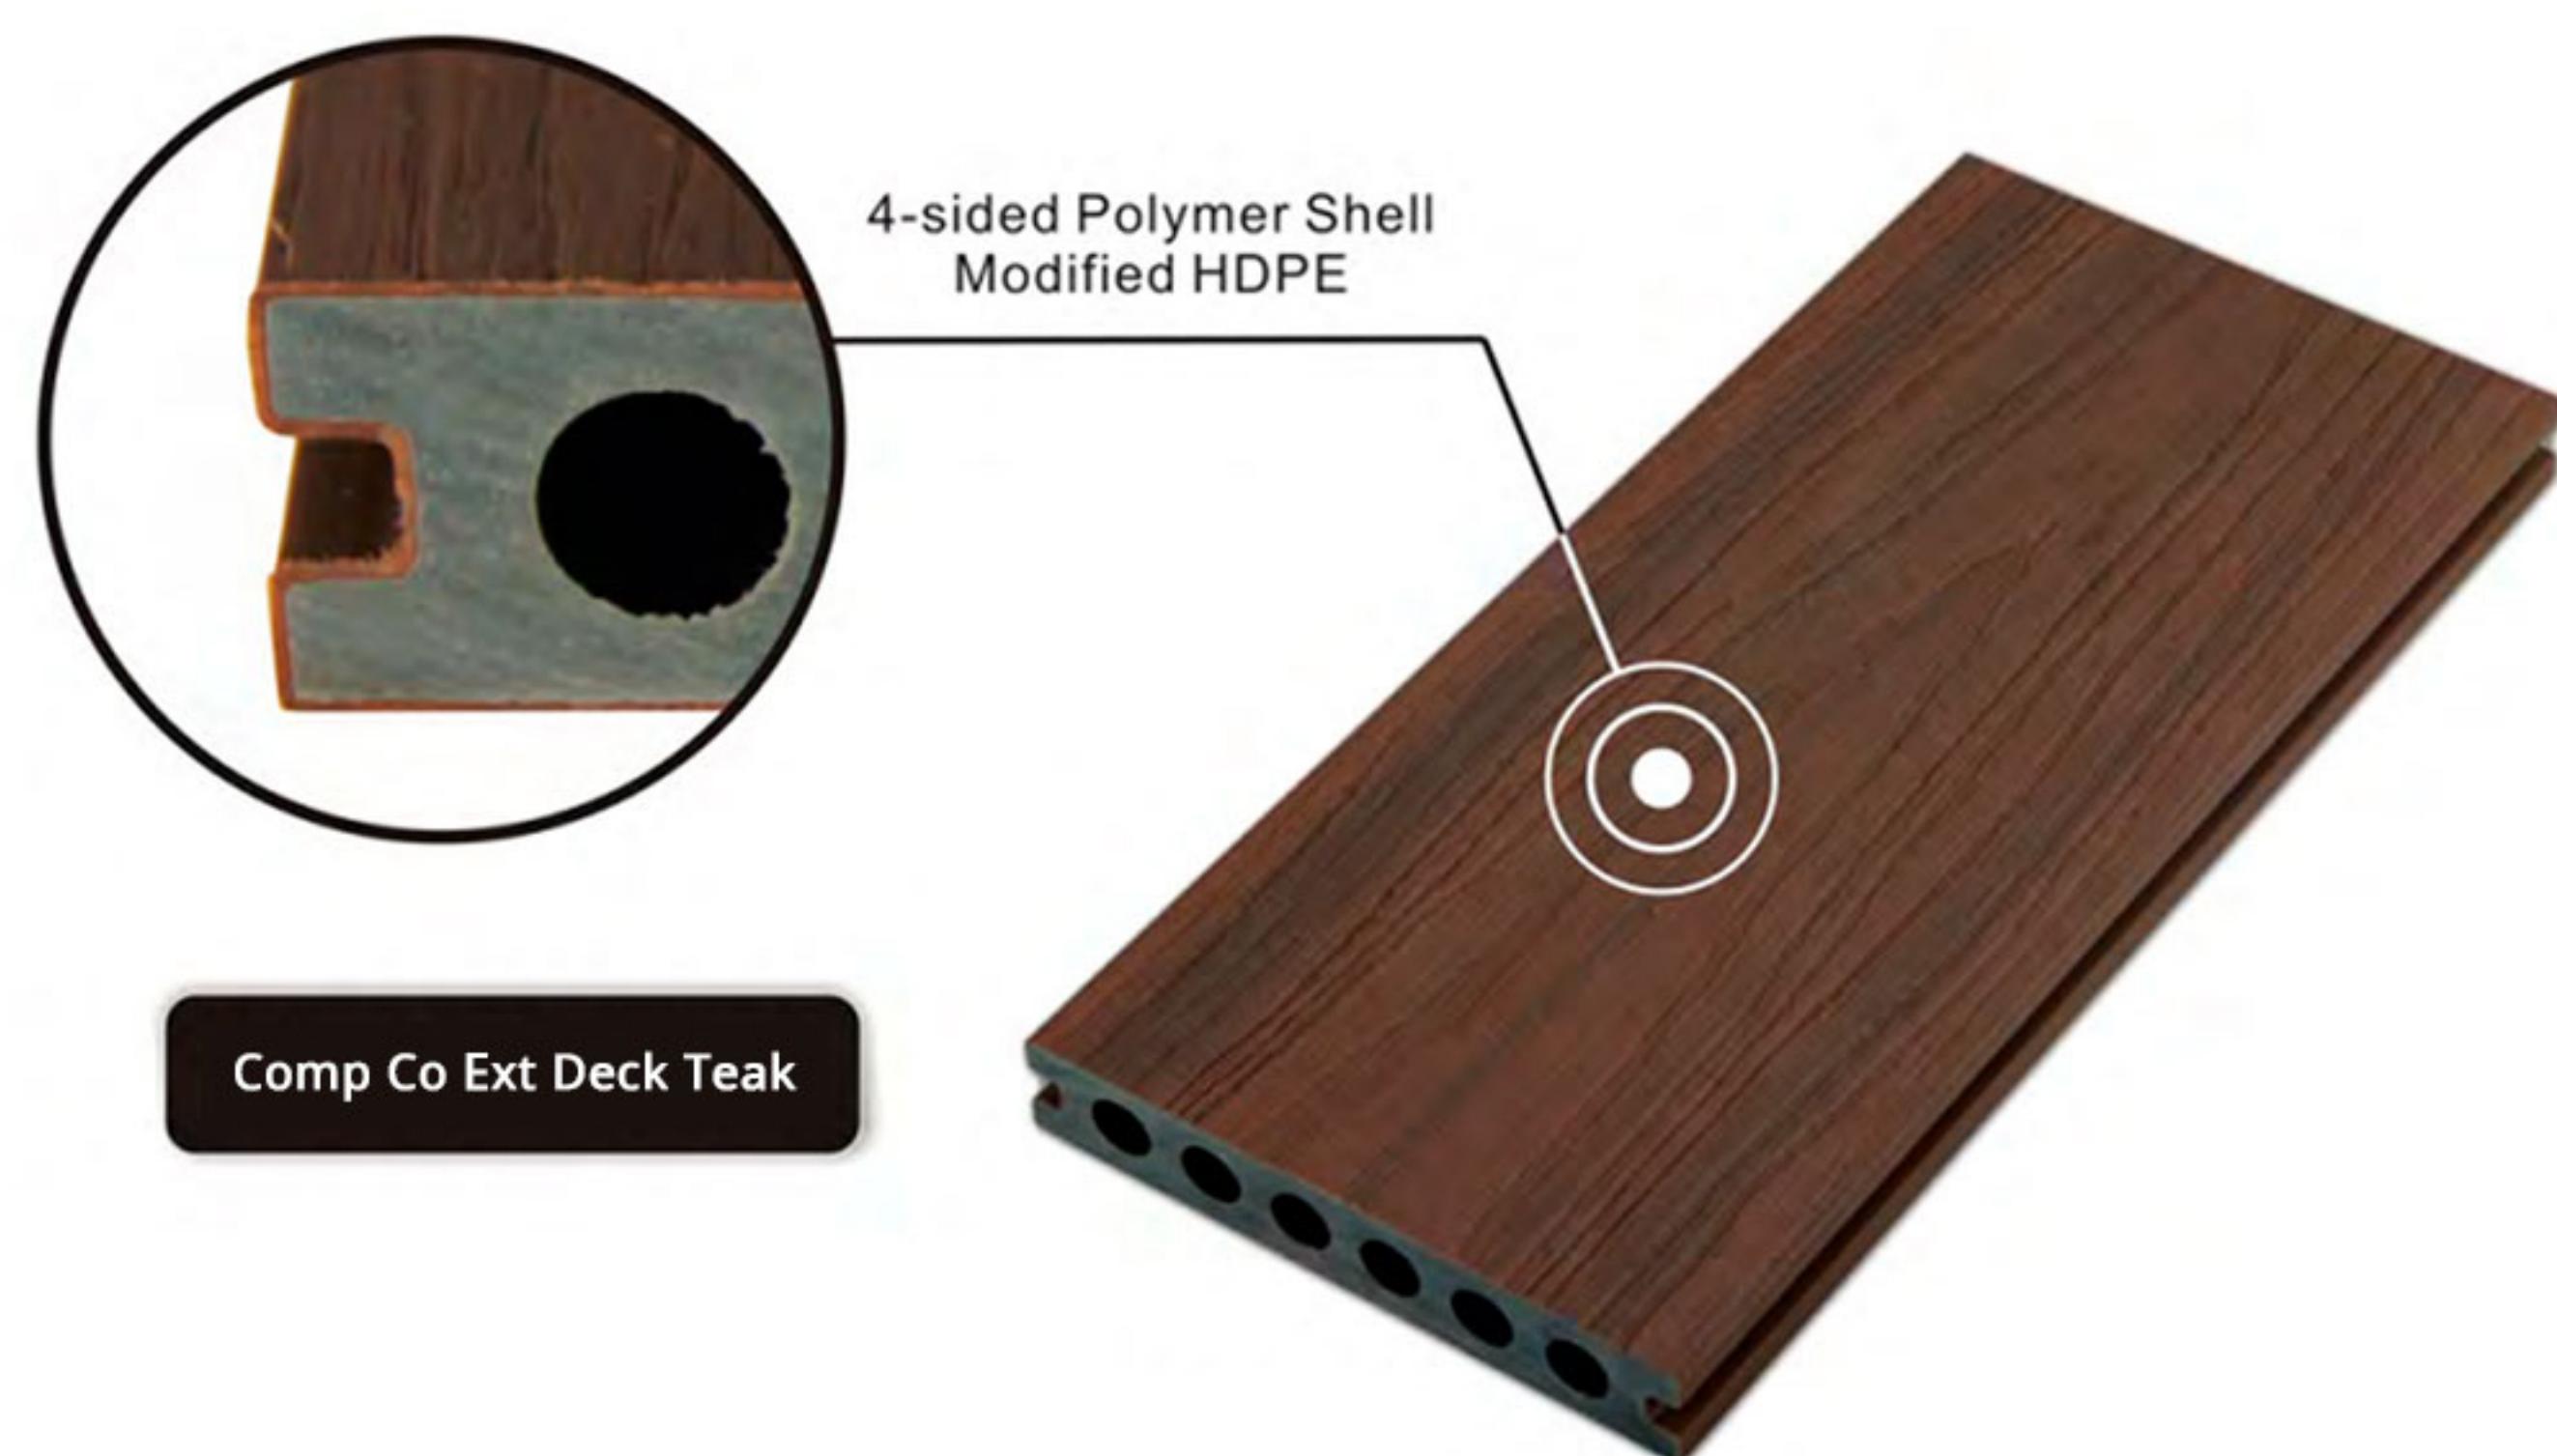

SMOKE GREY

OAK

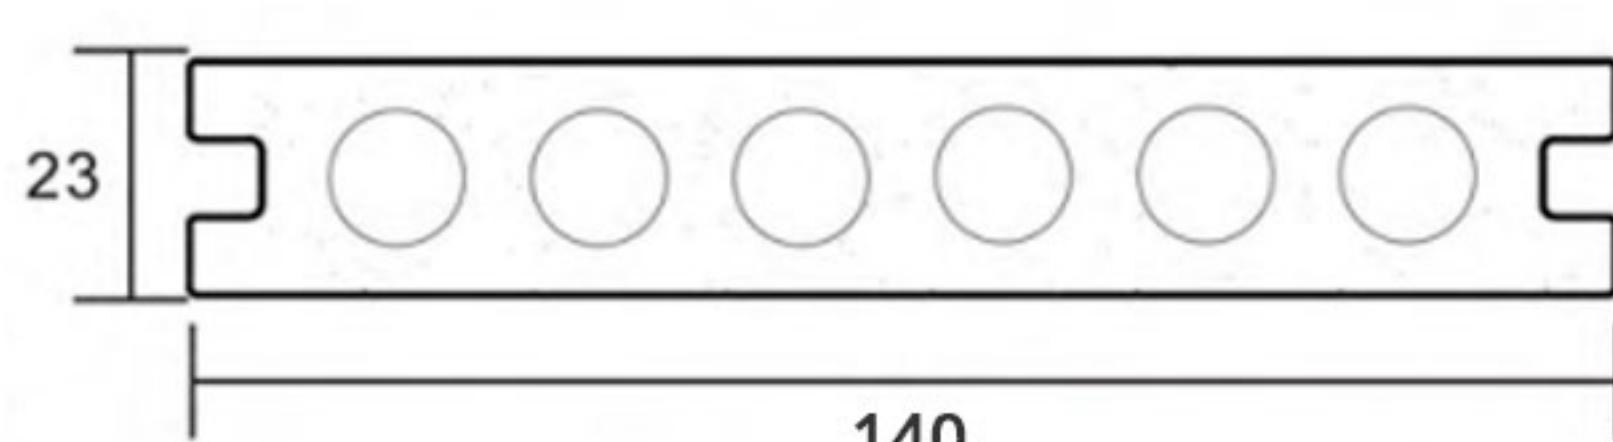

DARK TEAK

The smooth texture composite decking is designed for homeowners seeking a personalized outdoor living solution that enhances their home over time. Combining modern aesthetics with durability, this decking offers features like anti-slip properties, sound absorption, a soft texture, and UV resistance. It provides a safe and comfortable environment for outdoor gatherings, while its low-maintenance nature ensures long-lasting beauty. With its ability to withstand the elements and resist fading, this WPC decking delivers an exceptional outdoor experience, making it the perfect choice for those looking to elevate their home's exterior.

#### Profiles

All measurements are in millimeters.

Board Name	Cross Section	Board Type	Board Width	Board Thickness
Hollow Core		Hollow	140 mm	23 mm
Fascia		Solid	140 mm	12 mm

25 year limited warranty for durability	✓	✗

Composite decking is a new flooring material, a combination of wood fiber, HDPE and different additives. It can not only give the feeling and appearance of wood, but also can solve many problems of wood, like rotting, mildew, cracking, etc.

100% recyclable and eco-friendly, saving forest

Effortlessly lightweight, perfect for hassle-free installation.

Australia's highest slip resistant decking, for superior safety.

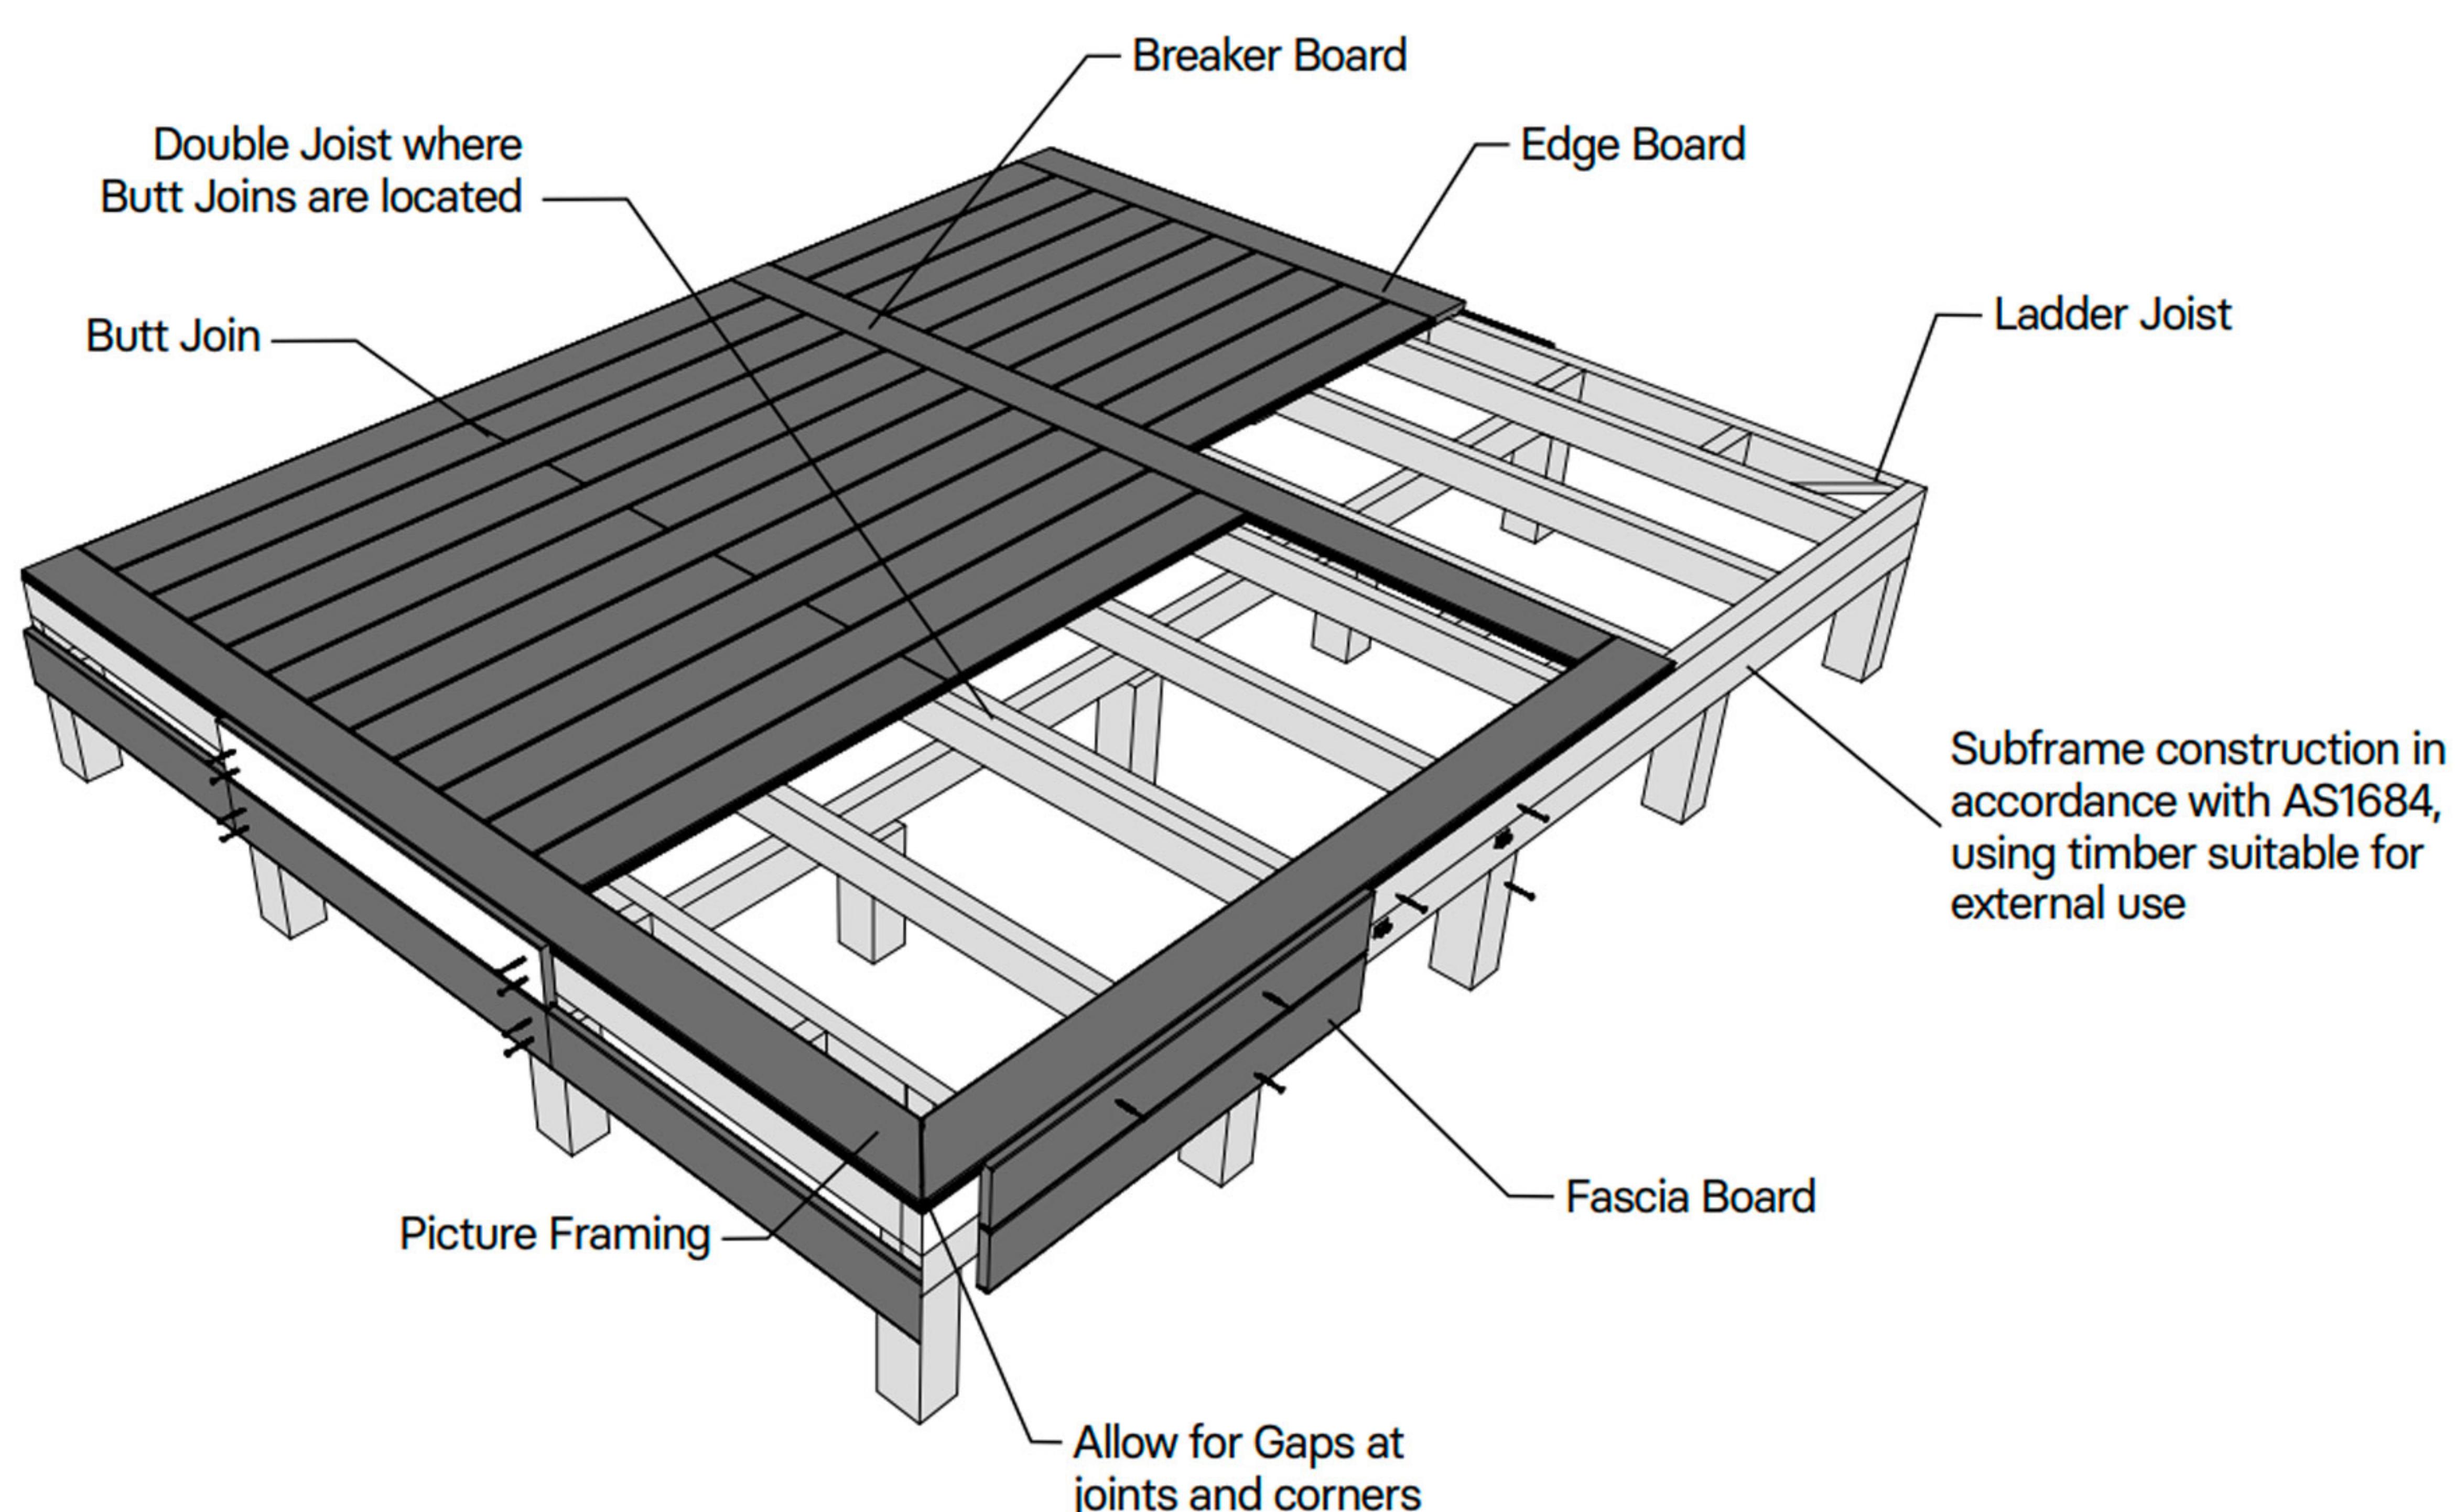

True timber aesthetics, natural to the touch.

Certified BAL29 for bushfire-prone areas.

## DECKING TERMINOLOGY

## DECKING ACCESSORIES

WPC STARTER CLIP 23MM - BLACK (PACK OF 50)

These stainless-steel decking clips with a 23mm width and black finish are used in outdoor decking projects, ensuring a neat and secure installation while providing durability and resistance to weather elements due to their stainless-steel construction.

Dimensions: 23MM

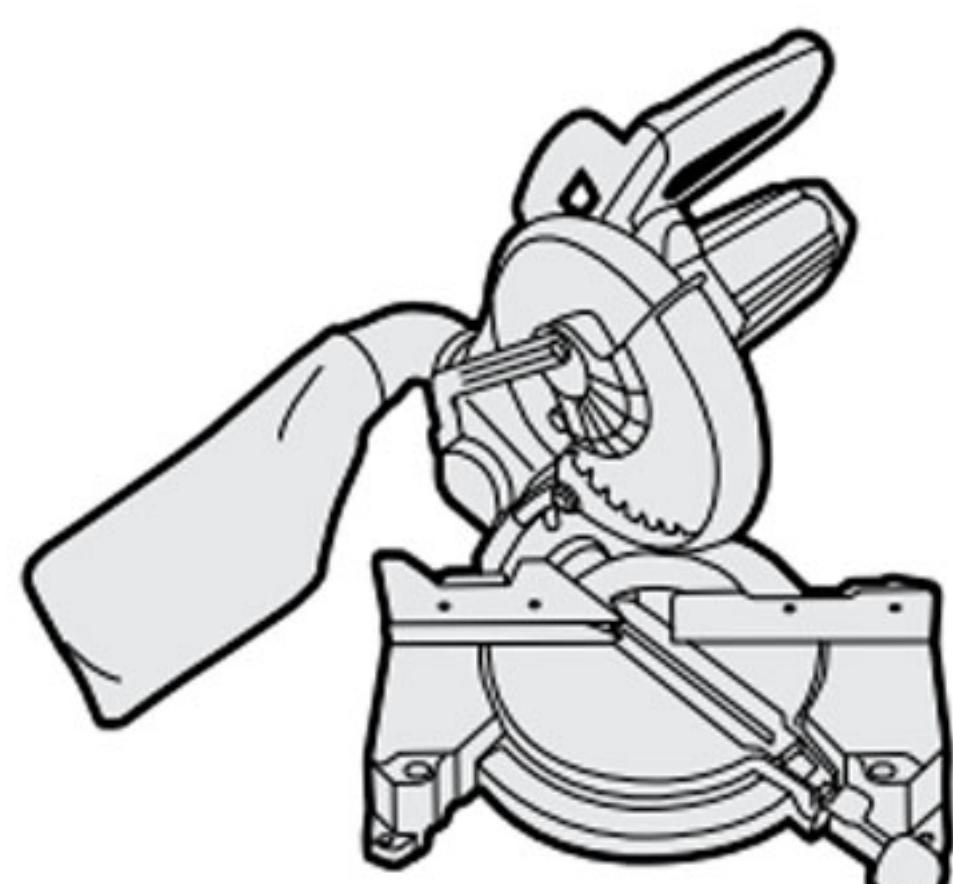

WPC SPACER CLIPS 6MM (PACK OF 50)

WPC clips are essential for installing WPC decking as they enable a concealed fastening system, creating a clean and seamless appearance without visible screws or nails on the surface. They allow for uniform spacing between boards while ensuring a secure and stable connection

Dimensions: 2MM, 4MM, 6MM

## RECOMMENDED TOOLS TO INSTALL DECKING

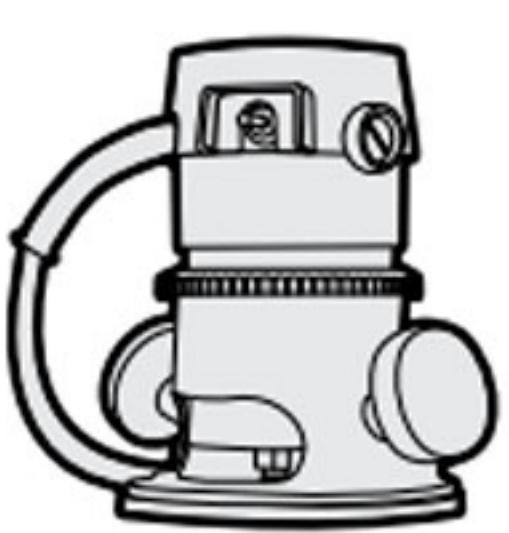

### TOOLS NEEDED

Mitre saw blade  
(254 mm–305 mm.  
40 teeth or more)

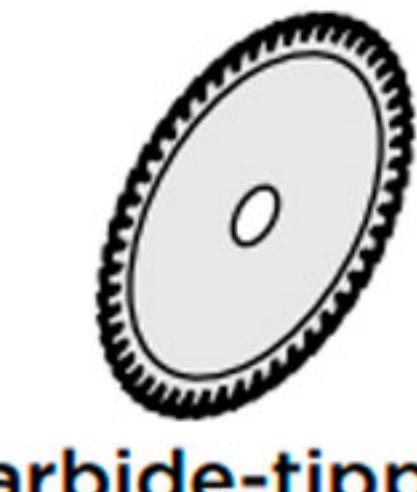

Trex groove  
router bit

Trex groove cutter

Standard power drill

Carbide-tipped  
blades

### SAFETY

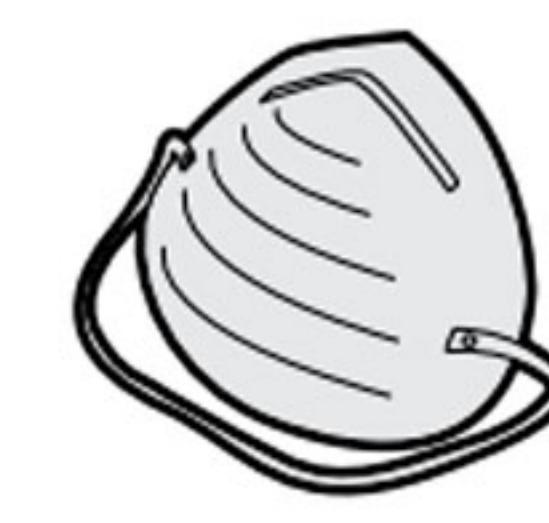

Long sleeves

Safety glasses

Gloves

Dust mask
